Study of packet Tracer Tool

Installation and User Interface.

Exp.no: 3

Date: 23/07/2026

Aim:

To study the packet tracer tool installation and user interface overview.

To understand the environment of CISCO PACKET TRACER to design simple networks.

Introduction:

A simulator, as the name suggests, simulates networks devices and its environment.

(i) It allows you to model complex systems without the need for dedicated equipment.

(ii) It is available for both the Linux and windows desktop environments.

(iii) protocols in packet Tracer are coded to work and behave in the same way as they would on real hardware.

User Interface overview:

(i) Menu Bar: This is a common menu found in all applications

(ii) Main Toolbar: This bar provides shortcut to the commonly used menu options.

(iii) Logical / physical Workspace Tabs: These tabs allows you to toggle between logical & physical work area.

Scanned with OKEN Scanner

(iv) Workspace : This area where topologies are created and simulations are displayed.

(v) Common Toolbar : This toolbar provides control for manipulating topologies

(vi) Real - time/ Simulations Tabs : These tabs are used for toggle between real and simulation modes.

(vii) Component box : contains all of the network end end to end devices available with packet Tracer.

Analyse the behaviour of network devices.

1.) From the network component box, select drag and drop the below components.

a.) 4 generic PC's and one HUB

b.) 4 generic pc's and one switch.

2.) Click on connections.

a.) Click on copper straight - through Cable.

b.) Select one pc and connect it to the hub.

c.) Similarly connect 4 PC's to the switch.

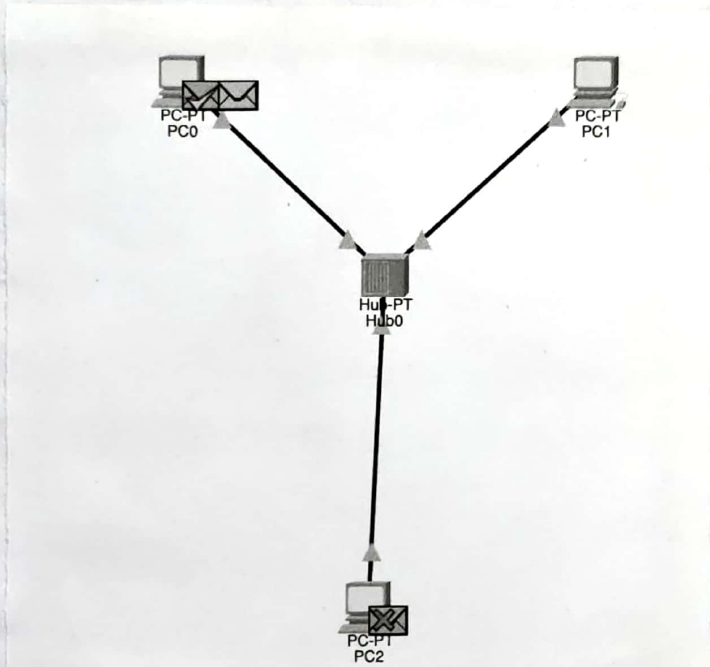

3.) Click on the pc's connected to the hub add IP address for each of the PC's

4.) Click on the PDU, drag and drop on one pc and then drop it on another pc. Observe the PDU.

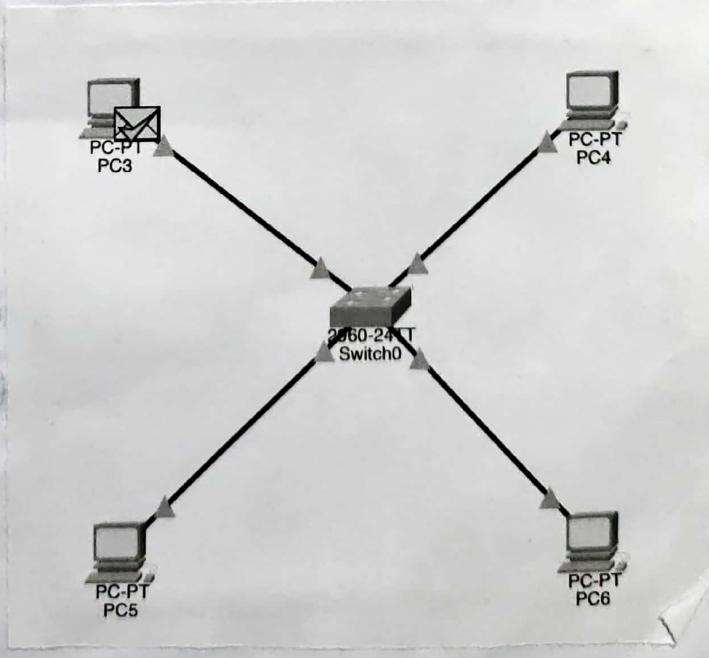

Scanned with OKEN Scanner

(V) Repeat step 3 to step 5 for the connected switch.

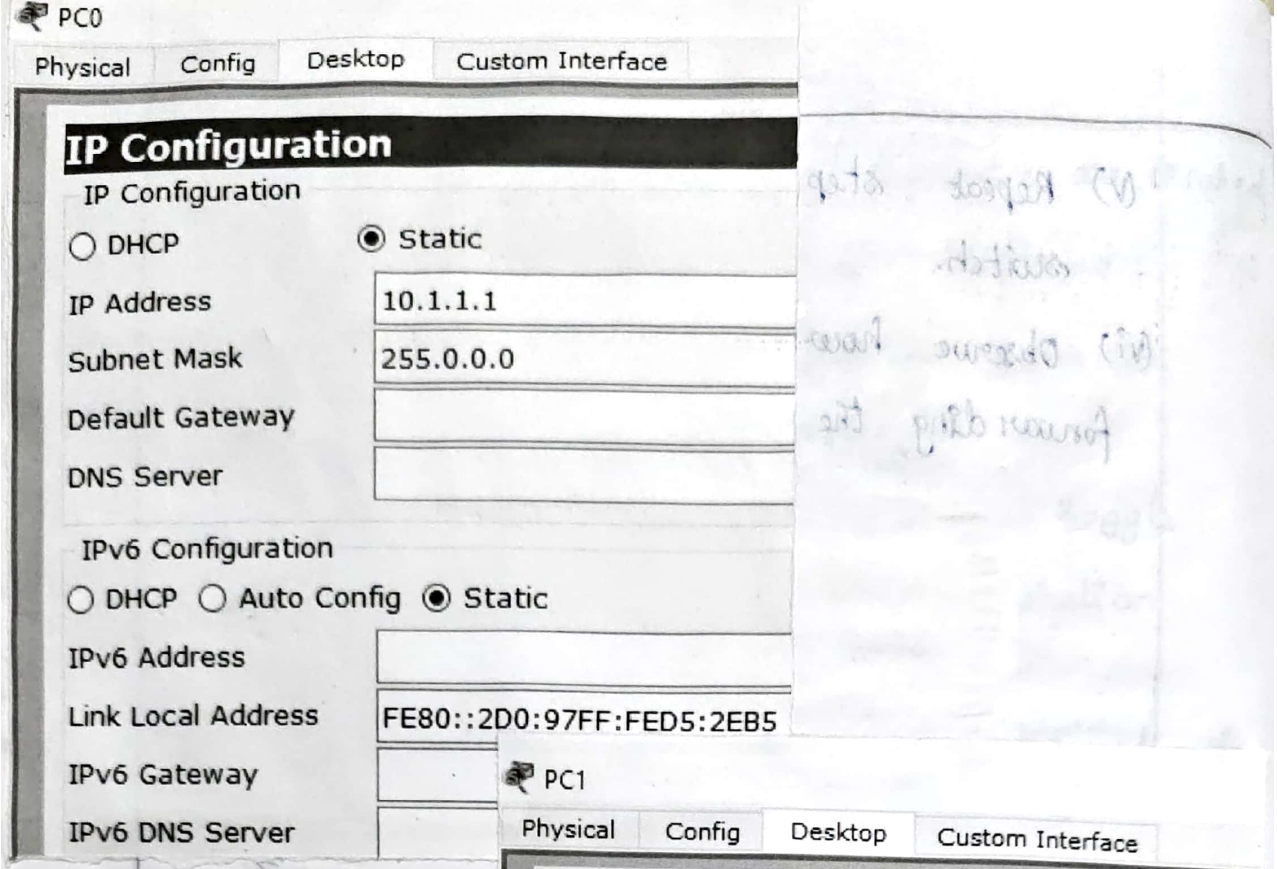

(Vi) Observe how the switch and HUB are forwarding the PDU.

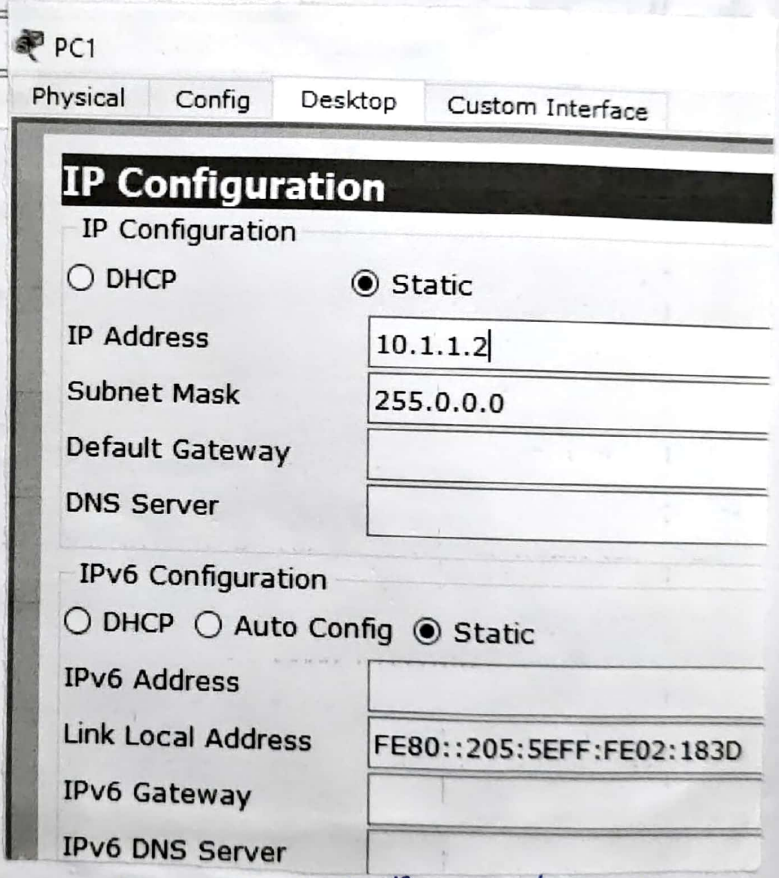

⇒ Hub

⇒ switch.

Result :

Thus, the 2 packet Tracer tool Installation and user Interface overview have been studied.
